Professional Summary

Computer Science undergraduate specializing in Cyber Security at Rashtriya Raksha University with a CGPA of **8.00**. Passionate about cybersecurity, secure software development, and network defense, with hands-on experience building security-focused applications and automation tools. Proficient in Python, Linux, networking, vulnerability assessment, and penetration testing, complemented by practical experience using industry-standard tools including Nmap, Wireshark, Burp Suite, and Metasploit. Continuously expanding expertise through internships, technical projects, and hands-on cybersecurity labs.

Technical Skills

- **Programming Languages:** Python, Java, C, C++
- **Cybersecurity:** Vulnerability Assessment & Penetration Testing (VAPT), Web Security, Network Security, OSINT, Threat Intelligence, Reconnaissance
- **Security Tools:** Nmap, Wireshark, Burp Suite, Metasploit Framework, OWASP ZAP, Packet Tracer, VirtualBox
- **OSINT Tools:** Shodan, Google Dorking, ExifTool, VirusTotal, WHOIS, crt.sh, DNSDumpster, URLScan.io, theHarvester, Maltego
- **Networking:** TCP/IP, DNS, HTTP/HTTPS, Routing, Switching
- **Operating Systems:** Kali Linux, Linux, Windows
- **Version Control:** Git, GitHub
- **Security Standards:** OWASP Top 10, CVSS v3.1, MITRE ATT&CK

Education

Rashtriya Raksha University	Gandhinagar, Gujarat
Bachelor of Technology (B.Tech.) – Computer Science & Engineering (Cyber Security)	2024 – 2028
CGPA: 8.00/10.00	
Relevant Coursework: Network Security, Computer Networks, Cryptography, Operating Systems, Database Management Systems, Data Structures & Algorithms	
Senior Secondary (CBSE)	2023
SVP Shikshan Awan Anusandhan Sansthan, Rajasthan	78%
Secondary (CBSE)	2021
Tagore Public School, Rajasthan	92.83%

Projects

- LogSentry – AI-Powered Security Information and Event Management (SIEM)** GitHub
- Engineered a production-ready AI-powered SIEM platform for centralized log ingestion, security event detection, threat intelligence enrichment, and incident reporting.
 - Developed a modular detection engine capable of identifying brute-force attacks, SQL injection, Cross-Site Scripting (XSS), path traversal, and command injection across Apache and Nginx log sources.
 - Integrated AI-assisted SOC analysis with rule-based detection and MITRE ATT&CK mapping to improve security event investigation and contextual analysis.
 - Implemented a React-based SOC dashboard with FastAPI backend, PostgreSQL database, Dockerized deployment, structured logging, and RESTful APIs for security monitoring.
 - Built automated reporting supporting PDF, CSV, ZIP, and JSON exports with executive, technical, and incident-focused summaries.
 - Achieved production readiness with comprehensive testing (116/116 tests passed), security hardening, structured observability, and CI/CD-oriented architecture.
 - **Technologies:** FastAPI, React, PostgreSQL, Docker, Python, TypeScript, Tailwind CSS, Threat Intelligence, MITRE ATT&CK, REST API
- PortIntel – Intelligent Network Reconnaissance and Port Analysis Platform** GitHub
- Engineered a modular Python-based network reconnaissance platform for automated host discovery, TCP/UDP port scanning, service fingerprinting, and security assessment.
 - Developed a multithreaded scanning engine to improve reconnaissance efficiency while maintaining accurate service detection and banner enumeration.
 - Implemented advanced reconnaissance capabilities including host discovery, banner grabbing, operating service identification, and configurable scan profiles.

- Integrated vulnerability intelligence by correlating detected services with the National Vulnerability Database (NVD) to identify publicly disclosed CVEs.
- Generated structured security assessment reports in JSON and CSV formats to support documentation and further analysis.
- Designed the application using a modular architecture to simplify future feature expansion, maintenance, and integration with additional reconnaissance modules.
- **Technologies:** Python, Socket Programming, Multithreading, Networking, TCP/IP, UDP, NVD API, JSON, CSV

Academic Resource Hub – AI-Powered Academic Resource Ecosystem

GitHub

- Contributed to the development of a full-stack academic resource platform for Rashtriya Raksha University, enabling secure sharing and management of academic resources.
- Implemented AI-powered PDF summarization, OCR-based text extraction, and contextual chatbot functionality using Gemini and Llama models to enhance resource accessibility.
- Developed real-time notification and communication features using Socket.IO, improving user interaction and platform responsiveness.
- Assisted in implementing Role-Based Access Control (RBAC), administrative dashboards, and resource verification workflows to strengthen platform security and management.
- Collaborated within a multidisciplinary development team using modern web technologies and version control practices.
- **Technologies:** React, Node.js, Express.js, PostgreSQL, Supabase, Socket.IO, Gemini AI, OCR, Cloudinary

Experience

Cyber Security Intern – Codec Technologies Pvt. Ltd.

Apr 2026 – May 2026

AICTE & ICAC Approved Internship Program

- Successfully completed a one-month AICTE & ICAC approved Cyber Security Internship focused on ethical hacking, vulnerability assessment, and network security.
- Performed hands-on security assessments using Linux, Nmap, Wireshark, Burp Suite, and Metasploit in controlled laboratory environments.
- Applied reconnaissance, vulnerability identification, and web application security testing methodologies through practical exercises.
- Strengthened practical knowledge of penetration testing workflows, network security concepts, and cybersecurity best practices.

Ethical Hacking Intern – iStudio

Jul 2026 – Present

- Participating in a structured Ethical Hacking Internship covering penetration testing, network security, web application security, Linux, and cybersecurity methodologies.
- Performing hands-on security labs involving reconnaissance, vulnerability assessment, and exploitation techniques within controlled environments.
- Developing practical skills with industry-standard cybersecurity tools including Nmap, Wireshark, Burp Suite, Metasploit, and related security utilities.
- Working toward a capstone cybersecurity project as part of the internship program.

Leadership Experience

Chief Marketing Officer (CMO) – HostelBites Startup

- Led branding, digital marketing, and customer acquisition strategies for a campus-focused food delivery startup.
- Collaborated with technical and business teams on product planning, operational workflows, and user engagement initiatives.
- Coordinated promotional campaigns, stakeholder communication, and platform outreach to support startup growth.
- Contributed to strategic planning and cross-functional decision-making within the startup team.

Certifications

- AICTE & ICAC Approved Cyber Security Internship – Codec Technologies
- Cyber Security Training Program – Codec Technologies (ICAC Recognized)
- Google Cybersecurity Foundations – Coursera
- Certified Cybersecurity Ethical Professional (CCEP) – Red Team Leaders
- TryHackMe – Junior Penetration Tester Learning Path (In Progress)
- Database and SQL – Infosys Springboard
- MATLAB Deep Learning Onramp – MathWorks
- MATLAB Workshop – Rashtriya Raksha University

Achievements

- Built and published multiple cybersecurity and software engineering projects on GitHub, focusing on SIEM, network security, AI integration, and OSINT.
- Successfully completed AICTE & ICAC Approved Cyber Security Internship at Codec Technologies.
- Participated in the **Offensive & Defensive Security Talks Workshop** organized by Knight Secured Company in collaboration with Cyber Leelawat.
- Participated in E-Summit 2025 hosted by IIT Bombay.
- Continuously develop practical cybersecurity skills through TryHackMe labs, Capture The Flag (CTF) challenges, and self-driven security research.
